WORK EXPERIENCE

SUMMER JAVA INTERNSHIP CUM TRAINING ONLINE BANKING SYSTEM

2023

During this internship I worked on replicating an online banking system, using Apache Tomcat Server for running Java Servlets and JSP Pages. For the database I used MySQL database, for its robustness. Operations such as Transaction record, User creations, User updation, etc are performed.

GUI BASED CALCULATOR

2023

While working on the minor project, I created a java swing library based calculator. It has a Graphical User Interface because of the use of various Swing Library Components Such as JLabel, JPanel, JWindow, etc.

LIBRARY MANAGEMENT SYSTEM

2024

I also worked on a library management system. The project was a group project where I mainly focused on keeping "Issue" and "Deposit" operations of the whole system. SQL database and Arrays are used to achieve the same.

WHY CHOOSE ME

I have worked on multiple languages during the Covid-Era. It helped me to be familiar with multiple programming approaches and also to grasp new things with a higher pace. It also excites me to learn new technologies. Working under your guidance I hope to learn things fast and can contribute in such a way to create a positive impact from my side.
